SAVE TIME AND IMPROVE PRACTICE EFFICIENCY

with LifeLearn Animal Health

Saving time and improving efficiency mean different things to different practice team members:

Some veterinarians need a faster way to find veterinary clinical answers at the point of need.

Some practices need a simple way to provide clients with information while maintaining optimal practice workflow.

Other practices need to stay connected to clients before, during, and after pet health appointments.

The challenge is that busy practices have little time to search different companies for different solutions to meet the whole of their needs.

Lifelearn provides customizable online solutions that save practices time and improve efficiency— before, during, and after a pet owner appointment.

WebDVM
Custom Veterinary Websites

With a suite of expert-written pet health content and online resources to improve compliance and help your practice communicate with and educate pet owners more effectively, **WebDVM positions your website as the go-to source of trusted information for pet owners**, which:

- Strengthens client engagement
- Improves compliance
- Drives repeat business
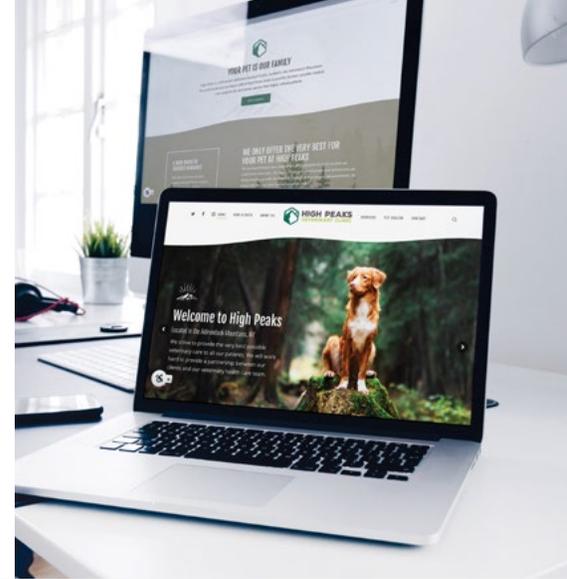

ALLYDVM
Customer Communication & Retention System

ALLYDVM's industry-leading client communication and retention software **empowers practices to improve client communications, increase engagement, and generate additional revenue** with little additional effort or marketing spend.

VetScribe
Custom Digital Veterinary Practice Content

VetScribe delivers expert-written, ready-to-use custom content that can be used in your practice emails, newsletters, website, blog, and across your social media channels to **educate pet owners, improve your online presence, and optimize your time** to focus on patient care.

" *They have done one of the best jobs, and we've been with them for a long time because the people really do listen. They treat their people well and they're always friendly to work with.*

— **Julia McPeek,** Hospital Administrator, Harmony Veterinary Center
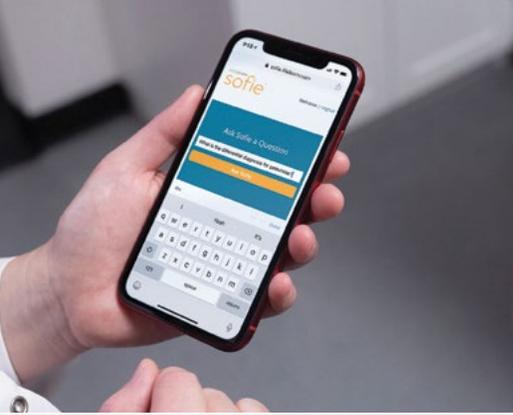

Sofie
Your Virtual DVM Assistant
Make medical decisions faster with Sofie. **Providing instant online access to over 40,000 pages from the top veterinary textbooks, journals, and conference proceedings,** Sofie helps veterinarians and veterinary technicians/nurses save time and improve efficiency by providing lightning-fast clinical answers at the point of need.

ClientEd
The Pet Health Education Resources for Pet Owners
Strengthen your team's role as animal health educators with ClientEd, the unique pet health education library with more than 2,100 client handouts that cover a wide range of pet health topics and species, all written in easy-to-understand language to improve compliance.
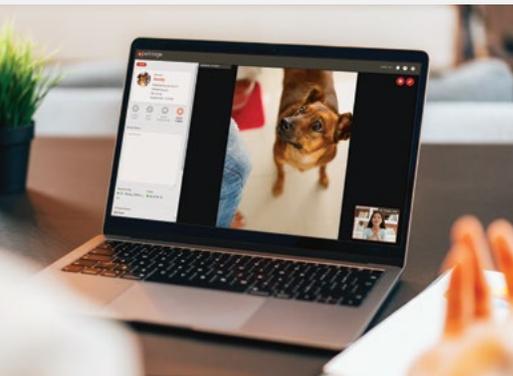

Petriage
Complete Veterinary Telehealth Solution
Petriage, the complete veterinary telehealth solution, is a unique, robust, and flexible telehealth solution that enables modern-day veterinary practices to **seamlessly integrate virtual care while maintaining the highest standards of patient care.**

PetNurse
After-Hours Veterinary Telephone Triage Service
Working as an extension of your veterinary practice, **PetNurse provides your clients with after-hours telehealth triage support** to provide pet owners with safe and timely assessments of their pets' health over the phone. Our team of live Registered Veterinary Nurses use trusted Clinical Protocols to evaluate the severity of the situation and specify clear next steps.
